EDUCATION

- | | |
|---|----------------------|
| • Bennett University | Greater Noida, India |
| • <i>B.Tech in Computer Science Engineering</i> | Nov 2023 – Jun 2027 |
| • Rani Laxmi Bai School | Uttar Pradesh, India |
| • <i>Higher Secondary School</i> | Apr 2020 – Mar 2022 |

WORK EXPERIENCE

- | | |
|---|----------------------|
| • Defence Research and Development Organisation (DRDO) | India (Hybrid) |
| • <i>AI/ML Intern – IBM ART Security Research</i> | March 2026 – Present |
| – Conducting adversarial robustness testing on deep learning models using IBM ART to identify model vulnerabilities. | |
| – Implementing adversarial attack and defense strategies improving model security testing coverage by 40% . | |
| – Analyzing adversarial perturbations and documenting security insights to improve AI reliability in critical applications. | |
| • NexCraft | India (Remote) |
| • <i>Software Development Intern</i> | Jan 2025 – Mar 2025 |
| – Built 5+ REST APIs using Node.js for CRUD operations and JSON-based data exchange. | |
| – Debugged API integrations and SQL queries using logs and edge-case testing, reducing recurring failures. | |
| – Tested APIs with Postman and added input validation and error handling to improve reliability. | |

ACADEMIC PROJECTS

- **Fin-Mon – Expense Tracker** [\[GitHub\]](#):
 - Built a full-stack **MERN application** with **JWT-based authentication** and **10+ REST API endpoints** for managing income and expense data.
 - Designed modular backend services and optimized **MongoDB queries**, reducing average API response time by **30%**.
 - Implemented data visualization using **Recharts**, enabling users to analyze spending patterns across **5+ categories**.
- **AI Image Generator** [\[GitHub\]](#):
 - Developed a web application integrating external **AI APIs** for real-time text-to-image generation with secure API key handling.
 - Implemented **asynchronous request handling** and error management, improving response reliability and reducing failed requests by **25%**.
 - Built a responsive UI supporting **multiple prompt inputs**, reducing user interaction time by **40%**.
- **Starry Scholar – AI Learning Companion** [\[GitHub\]](#):
 - Built a **Next.js + TypeScript** application with modular components and structured API integration for AI-powered learning assistance.
 - Designed prompt-based workflows to generate summaries and answers, improving response relevance by **30–35%**.
 - Optimized frontend state management and API calls, reducing redundant requests and improving load performance by **25%**.

SKILLS

- **Languages:** C++, Python, JavaScript, SQL
- **AI / ML:** Machine Learning, NLP, Deep Learning Basics, Transformer Models, Adversarial ML (IBM ART)
- **ML Tools:** TensorFlow, PyTorch, Scikit-learn, Jupyter, Model Evaluation, Hyperparameter Tuning
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, Flask, REST APIs, JSON
- **Databases:** MySQL, MongoDB
- **Mathematics:** Linear Algebra, Probability, Calculus for Machine Learning
- **Tools:** Git, GitHub, Postman, VS Code
- **Practices:** EDA, Unit Testing, API Testing, Problem Solving, Code Optimization

ACHIEVEMENTS

- | | |
|--|---------------------|
| Google Developer Student Club | Bennett University |
| <i>Technical Core Member</i> | Sep 2023 – Nov 2024 |
| • Solved 250+ DSA problems on LeetCode (Rating: 1690) | |
| • 1st Runner-Up in Ideathon for building a UI/UX-driven innovation solution. | |
| • Secured 3rd Rank in Tech Arena Competition. | |
